

## Professional Summary

Application developer with 1+ year of experience specializing in performance optimization and complex problem-solving. Built production applications serving 300+ daily users with 25% performance improvements in agrifood manufacturing environments. Proven ability to revive stalled projects and adapt quickly to changing requirements under tight deadlines. Experienced across React, Django, Flutter, and database optimization with expertise in translating unclear client requirements into functional solutions.

## Education Level

### Bina Nusantara University

Bachelor's in Mobile Application and Technology | 3.52/4.00

Sep 2021 - Nov 2025 (Expected)

- Focusing on Mobile and Web Application development on modern development practices
- Gained experience in integrating applications with backend services, APIs, and cloud platforms (Firebase)
- Studied and applied software engineering principles, Agile methodologies, version control, and continuous integration in mobile development environments.

## Working Experiences

### Codingo Assignments Pte. Ltd.

Application Developer (Freelance)

March 2025 - Present

- Delivered 7+ custom software solutions including websites, APIs, dashboards, and wireframe designs for international clients with 98% client satisfaction rate
- Managed end-to-end project lifecycle with 3-5 day delivery deadlines, adapting technology stack based on client needs (Django, React, Node.js, Flask, TypeScript)
- Conducted comprehensive code reviews and documentation for client handovers, ensuring seamless project transitions and long-term maintainability
- Worked both independently and in collaborative teams, delivering scalable solutions across diverse industries and technical requirements

### PT. Japfa Comfeed Indonesia, Tbk

Application Developer (Intern)

Feb 2024 - Feb 2025

- Implemented Django-based solutions supporting 300+ users daily and unblocked 8 stalled development tasks
- Built and optimized RESTful APIs with Flask and Oracle Database, achieving 25% faster response times and enabling seamless mobile-web integration
- Enhanced admin dashboard functionality by integrating WhatsApp messaging system and implementing multilingual support, improving user engagement by 30%
- Collaborated with UI/UX team to deliver pixel-perfect responsive interfaces across all projects, ensuring 100% cross-browser compatibility
- Participated in Agile development process with daily standups, sprint planning, and code reviews, consistently achieving 95% sprint goal completion rate
- Optimized database performance through query optimization and indexing strategies, reducing page load times by 35%
- Successfully managed rapidly changing requirements under tight deadlines, demonstrating adaptability in fast-paced agrifood manufacturing environment

## Technical Skills

- Programming Languages:** JavaScript, TypeScript, Python, Dart, SQL, HTML5, CSS3
- Frontend Development:** React.js, Flutter, Bootstrap, Tailwind CSS, Responsive Design
- Backend Development:** Django, Flask, Node.js, Go, RESTful APIs, API Integration
- Databases:** PostgreSQL, Oracle SQL, MySQL, Supabase, Firebase Firestore
- Tools & Technologies:** Git, GitHub, VS Code, Postman, Docker (Basic), Agile/Scrum
- Cloud & Services:** Firebase, Supabase, AWS (Basic), API Development & Testing

## Core Competencies

- Technical Expertise:** Full-Stack Development, Database Optimization, API Design, Mobile Development
- Professional Skills:** Troubleshooting, Project Management, Cross-functional Collaboration
- Communication:** Fluent in Indonesian (Native), Professional English Proficiency
